#### Investment Objective

The Protected Deposit Bonus funds are designed to provide returns that are linked to the performance of both the FTSE 100 and S&P 500 indices, whilst providing a defined level of capital protection (from 95% to 100%) each quarter. The aim of the funds is to provide investors with a means of investing in international equity markets, without sacrificing their basic desire for capital protection.

#### How the Fund Works

At the start of each quarter a bonus rate is declared for each fund. This rate is expressed as a percentage of the protected amount of the respective fund. Provided neither the FTSE 100 or S&P 500 indices do not end the quarter below their respective starting levels, the bonus is paid and added to the fund's protected amount. This then forms the starting value of the fund for the following quarter.

#### Important Note

**For Financial Advisers only. Not to be distributed to, nor relied on by, retail clients.**
