

### PERFORMANCE DATA AS AT 28 FEBRUARY 2026

This booklet contains a number of different performance measures and time periods to help you assess the fund range. Included in the booklet you will find:

#### Cumulative Performance

this shows you the percentage increase or decrease in a fund's performance over a specified time frame. We show time periods of 1 month all the way to 10 years.

#### Annualised Performance

this is effectively the cumulative performance of the fund converted into the average yearly growth. For example, if a fund has achieved 23.58% growth over the last 3 years, annualised performance will show 7.31% over the same period. This means the fund has effectively achieved a growth of 7.31% each year for the last 3 years.

#### Discrete Performance

this is the cumulative performance but presented in 5 discrete 12 monthly periods, normally on a rolling quarterly basis and calendar year. It allows you to see how the fund has performed for each individual year over the last 5 years.

The greater the variation in a fund's set of published unit prices the more 'volatile' the fund is and therefore potentially more risky. The less variation, the more consistent the fund is and generally speaking less risky. As with any performance data, the past is not necessarily a guide to the future. Just because a fund has performed consistently over the last 3 years doesn't mean it will do so again. We are not responsible for, and will not compensate your policy in relation to, the performance of underlying funds.

### IMPORTANT

- Performance statistics include the fund's own management charges, but excludes any RL360 product charges and are calculated in the asset currency, nav to nav, on a total return basis.
- Where no performance data is available a hyphen (-) will be shown.
- Share classes displaying \* have performance data calculated prior to the inception date. This is based upon a simulated /extended track record.

### RISK RATING

Ratings range between 1 and 7. 1 = lower risk, potentially lower reward, 7 = higher risk, potentially higher reward. Ratings are taken from the fund manager's Key Investor Information Document. (KIID). KIID's are produced for all UCITS compliant funds and provide a standardised methodology for risk and charge calculations.

### FUND KEY

**A:** Closed to new investors and switches in.

**B:** Suspended to all trading. Please refer to the Fund Updates section of our website.

**R:** Fund is pending removal from the range due to a fund manager driven event or an internal sector review. Please refer to the Fund Updates section of our website.

### CUMULATIVE PERFORMANCE

The following tables detail the cumulative performance of each fund in the range up until 28 February 2026. For example the 1yr % figure is the percentage growth between 1 March 2025 and 28 February 2026.

### ANNUALISED PERFORMANCE

The following tables detail the annualised performance of each fund in the range up until 28 February 2026. For example the 3yr % figure is the average annual percentage growth achieved between 1 March 2023 and 28 February 2026. We also provide the 5yr volatility. This is a statistical measurement using standard deviation and shows how widely a range of returns have varied from the fund's average return over a particular period. If a fund had an average return of 5% and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%.

### ANNUALISED PERFORMANCE

The following tables detail the annualised performance of each fund in the range up until 28 February 2026. For example the 3yr % figure is the average annual percentage growth achieved between 1 March 2023 and 28 February 2026. We also provide the 5yr volatility. This is a statistical measurement using standard deviation and shows how widely a range of returns have varied from the fund's average return over a particular period. If a fund had an average return of 5% and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%.

### ANNUALISED PERFORMANCE

The following tables detail the annualised performance of each fund in the range up until 28 February 2026. For example the 3yr % figure is the average annual percentage growth achieved between 1 March 2023 and 28 February 2026. We also provide the 5yr volatility. This is a statistical measurement using standard deviation and shows how widely a range of returns have varied from the fund's average return over a particular period. If a fund had an average return of 5% and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%.

### ANNUALISED PERFORMANCE

The following tables detail the annualised performance of each fund in the range up until 28 February 2026. For example the 3yr % figure is the average annual percentage growth achieved between 1 March 2023 and 28 February 2026. We also provide the 5yr volatility. This is a statistical measurement using standard deviation and shows how widely a range of returns have varied from the fund's average return over a particular period. If a fund had an average return of 5% and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%.

Name	Fund Key	Risk Rating	ISIN	Inception Date	Annualised Performance

### IMPORTANT INFORMATION

The figures in this booklet have been prepared for information purposes only and are not an invitation to purchase a fund on the basis of the data given. RL360 does not provide investment advice and does not recommend the use of any fund manager or investment fund detailed within this booklet.

Before selecting funds for your policy you should read the product's most recent Fund Guide (where one is available), and also read the supporting materials made available by the fund manager for your chosen funds. These will commonly detail how the fund is structured, how it is performing, the make up of its underlying assets and other important information. The final responsibility for fund selection lies with you and your adviser. If the funds selected for your policy reduce in value, this will reduce your policy value and RL360 will not compensate you as a result.

Where you invest in funds that are denominated in a currency different to that of your policy, the investment returns will be subject to currency risk.

Where the provider of a fund linked to your policy becomes insolvent or is unable to meet its liabilities for any reason, your policy will suffer the loss.

The funds linked to your policy value will be owned wholly by RL360 and in most cases, as we are a corporate investor, you will not be eligible for compensation under investment compensation schemes.
